TUAN PHUNG

PROFILE

Former Information Security and Compliance Engineer for Go Reply with expertise in networking and cloud security.

After being exposed to front-end development in the working environment, I picked up programming out of interest where it has now become a hobby and a passion of mine.

It has offered an engaging challenge to continually learn and improve my skills in front-end development.
Now focused on pursuing this passion in becoming a Front-End developer, I am motivated in expanding my skills in this space and excited for what's ahead.
